ASTM E84 FIRE PERFORMANCE

Crafted for both performance and design flexibility, TAG wood veneer panels feature a refined layered construction with natural veneer surfaces and a stable MDF core. Delivered prefinished for immediate use, they streamline installation while maintaining a premium aesthetic. Ideal for a wide spectrum of applications, these panels elevate interiors across residential, commercial, and hospitality environments.

DIMENSIONS (MM)	2790 x 1240
TOP LAYER THICKNESS (MM)	0.6
CARRIER	MDF Carb 2
QUALITY	Exclusive Premium
WOOD SPECIES	American Walnut
JOINTING TECHNIQUE	Mix Matched
STRUCTURE	Brushed

Size

2790 × 1240 × 19 mm (4' × 9' × 3/4")

Composition

TAG panels feature a natural wood veneer surface, stained and protected with multiple layers of UV-cured lacquer for enhanced durability. The core consists of high-density MDF, providing structural stability and consistency, complemented by a balancing veneer backing layer to ensure long-term performance.

Bonding Technology

Manufactured using advanced low-temperature high-pressure pressing techniques, TAG panels achieve optimal fiber saturation and a uniform, high-strength bond ensuring dimensional stability and superior panel integrity.

Finish

Finished with water-based stains and sealed with multiple layers of UV-cured, ultra-low emission varnish.

Available in:

- Matte finish
- Semi-matte finish

Surface Protection

Panels are supplied with removable protective film to safeguard surfaces during transport and installation. Protection may be applied to one or both sides depending on specification.

Packaging

- 25 panels per pack
- Pack dimensions: 2800 × 1250 × 580 mm (49.2" × 110.2" × 22.8")
- Approximate weight: 1200 kg (2646 lbs) per pack

THE ART OF TOUCH

Advanced techniques create an exceptionally soft-touch surface with a deeper, more expressive brushed wood character. The super matte finish enhances the natural warmth and elegance of wood, while deep brushing reveals the authentic texture and richness of every grain.

PROTECTION AGAINST SPILLS

Designed for real-life performance, our surfaces offer enhanced resistance to liquids in everyday use. Advanced finishing technology seals and protects each panel, helping prevent absorption and safeguarding the integrity of the material against spills and drips without compromising its natural look and feel.

SCRATCH RESISTANT

Engineered for everyday durability, our panels combine strength with refined aesthetics. A multi-layer finishing system provides advanced protection against micro-scratches, preserving the surface integrity without compromising its smooth touch, depth of color, or natural appearance.
